Is my child taking drugs?

## HOW TO TELL IF MY CHILD IS VAPING SPACE OIL DRUG

### What is Space Oil Drug?

- An emerging drug with no standard formula.
- Often contains etomidate which requires doctor's prescription.
- Likely to be mixed with other drugs.
- Can cause serious physical and mental harm, including addiction, memory loss, nasty fall, unconsciousness, and even death.
- Increase risk of injury and being assaulted.
- Vaping space oil drug is the same as taking drugs.

If you suspect that your child is vaping, you should communicate with school personnel and seek help from healthcare professionals immediately.
