## Know your body

Human body consists of various organ systems, each comprises of a number of organs performing particular tasks.

All boys and girls have the same organ systems with exception of the reproductive system. Reproductive system is for giving birth to offspring. The system includes internal and external sex organs. Each sex has its own unique reproductive organs. The external sex organs include penis and scrotum in boys; and vulva in girls.

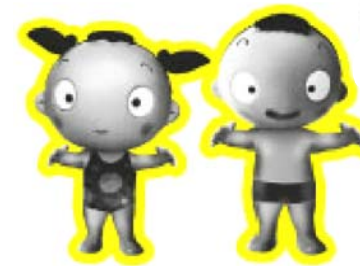

## Gender equality

Everyone is unique. We should accept and respect each other's differences and similarities. Boys and girls enjoy the same rights and opportunities across all sectors of society. Choice of occupation should not be limited by gender.

## Your body belongs to you

✔ Being the master of your own body, you should treasure and protect yourself.

✔ Your underwear covers your private parts, these include penis and buttocks in boys, chest, vulva and buttocks in girls. No one should ask to see or touch them without your permission. You should not look or touch other people's private parts either.

✔ Private is private. Do not show or touch your private parts in public. You should not obey to the calls of nature in public places exposed to the public view.
